Not Applicable	1 yard dumpster \$12.25; 1.5 yard dumpster \$15.99; 2 yard dumpster \$19.36; 3 yard dumpster \$26.66; 4 yard dumpster \$30.32; 6 yard dumpster \$38.90; 8 yard dumpster \$45.75.	None Indicated
Notes: None										

General Notes

- The above solid waste carrier information is portrayed **for WUTC regulated solid waste carriers only**.
- Categories of solid waste customers defined by the WUTC include: single family residential, multi-family residential and commercial. **Multi-family rates are not depicted here.**
- Categories of commercial solid waste collection service as defined by the WUTC include: "Container Service - Non-Compacted - Company-owned container"; "Container Service - Non-Compacted - Customer-owned container"; "Container Service - Compacted - Company-owned container"; "Container Service - Compacted - Customer-owned container"; "Drop Box Service - Non-Compacted - Company-owned drop box"; "Drop Box Service - Non-Compacted - Customer-owned drop box"; "Drop Box Service - Compacted - Company-owned drop box"; "Drop Box Service - Compacted - Customer-owned drop box". **The only Commercial rates provided here are: "Container Service - Non-Compacted - Company-owned container".**
- According to statute, Washington State cities have the authority to contract for solid waste hauling services and associated billing, or to provide their own municipal collection service. Counties have not been granted this option by the legislature. However, statute does direct the WUTC to require regulated solid waste collection companies to comply with the service levels set in the local solid waste management plan. The WUTC defines the service area and monetary collection rates for private firms that service all county residents, as well as for private firms that service those municipalities which do not provide garbage collection service or contract for such service.
- **Of the 280 cities in Washington, 187 take advantage of their option to contract for service or provide their own service. Consequently, the WUTC regulates the solid waste haulers that service approximately 49% of the state's population.** (This includes 40% of the state's population that resides in unincorporated areas, and 9% of the state's population that resides in incorporated areas.)
- Currently, there appears to be no complete tabulation of solid waste collection rates charged to residents of Washington State municipalities is available, and thus there is incomplete knowledge of the direct economic impacts of solid waste disposal on approximately 51% of the state's population.
- [A Certificate \(or "G-permit\) means the certificate of public convenience and necessity issued by the Washington Utilities and Transportation Commission](#) under the provisions of chapter 81.77 RCW for the operation of solid waste collection companies.
- A tariff names rates for the collection, transportation, and disposal of solid waste, and if noted, recycling and yard waste (a document outlining rates, terms and conditions for providing service.) While the G-permit provides an overall legal description of the geographical area in which a carrier is allowed to operate, a tariff defines rates for services and service areas within the geographical area defined in the G-permit. Further, tariffs define the rates a permitted solid waste carrier charges to its residential, multifamily and commercial customers

- 1) Data used here are gathered from individual facilities and consolidated into a main database from which this spreadsheet is derived. Referral to the actual report forms is suggested in order to resolve questions or before drawing conclusions.
- 2) Facilities which show zero production are for year 2002 only. Production amounts can vary by large amounts from year to year depending on lagoon cleanout operations, etc.
- 3) For the categories related to TRANSPORT TO and RECEIVED FROM, tonnage sums are totaled and reported in parentheses if the sums are different from that reported by the facility. Reasons for discrepancies are varied and need to be investigated on an individual basis if needed.
- 4) The term "ctd." means that the data for the facility is continued in another column where extra lines were used so that additional data could be included.
- 5) WWTP = Waste Water Treatment Plant; STP = Sewage Treatment Plant; BS = Biosolids; LSP = Lime Stabilization Plant; POTW = Publicly Owned Treatment Works.

Franklin County Solid Waste Priorities and Needs for the Near Future:

- Continue and expand general educational efforts to promote waste reduction
- Implement a backyard composting program
- Publicize existing commercial material/waste exchange programs serving the region
- Support existing businesses that promote waste reduction
- Work with local business groups to help distribute information and sponsor waste consultations
- Expand in house programs
- Support review of refuse collection rate incentives once a full range of recycling programs have been implemented
- Monitor waste reduction programs
- Continue and expand curbside collection programs
- Continue and expand drop-box program in rural designated areas
- Continue Kennewick's recycling hotline and develop additional county-wide hotlines
- Assist local businesses in making private arrangements for recyclable collection
- Conduct a yard debris collection and composting feasibility assessment after a yard waste composting program is in operation
- Develop a monitoring/evaluation program
- Continue existing landfill operations at the Richland Landfill
- Periodically assess options for Pasco and Franklin County municipal solid waste disposal
- Continue voluntary subscription to collection service
- Support evaluation of collection rate structure
- Continue existing direct haul, transfer, and export activities
- Develop plan for long-term disposal
- Develop a biosolids management policy
- Investigate potential for co-composting
- Maintain current disposal methods for construction and demolition waste, industrial waste, petroleum contaminated soils and wood waste
- Continue disposal of tires at landfill
- Develop biomedical waste management plan
- Identify alternatives for proper disposal of appliances

Franklin County's Projected Solid Waste Income and Spending, 1999 (as compiled by Jeff Kelly-Clarke, Director, Snohomish County Public Works)

Spending
